Re: Proposal for the preparation of the RFP (Contractor Bid Documents) for the Structural Stabilization of 3240 6th Avenue
Troy, New York.

Dear Tony:
We have performed numerous site visits and developed an overall Structural Condition Assessment Report for 3240-6th Avenue (please refer to Photograph 1). In addition to the engineering report, we have developed a list of tasks for the structural stabilization of the building and have provided a detailed engineer's estimate of construction.

Photograph 1
As part of our work activity, we have prepared the engineering drawings (floor plans) for the basement, first and second floor levels along with the corresponding structural details for the stabilization of the building. Photograph 2 shows a typical view of the failed rear Easterly masonry wall which will be part of the stabilization process for the structure.

Using these materials that we have generated, we will prepare the Request for Proposals (RFP) for contractor selection in order to perform this needed work activity to stabilize the building in accordance with the IBC Building Code (2015) for New York State.

The total cost for us to prepare the RFP materials which will include each of the above referenced items along with a brief itemized Scope of Work for the contractor to assist in the understanding of each task required is $5,400.
If you have any questions please do not hesitate to call.

Very truly yours,

R. Russell Reeves, CEng., P.E.
